

THE PROBLEM

Five Critical Business Challenges

Without centralised visibility, supply chain teams faced compounding operational risks.

Stockout Risk

Low-stock products went undetected, triggering avoidable shortages.

Shipment Delays

No real-time tracking of shipment status or delivery performance.

Top-Seller Blind Spots

Best-selling products were difficult to identify and monitor.

Revenue Visibility Gaps

Revenue performance lacked a centralised, interactive view.

Fragmented Monitoring

No unified platform to track supply chain KPIs in one place.

Dashboard Features at a Glance

KPI Cards & Revenue Analysis

At-a-glance performance metrics with revenue breakdowns by category and region.

Top-Selling Products

Ranked product analysis with units sold and revenue contribution.

Shipment Status Monitoring

Live delivery tracking with status filters for shipped, in-transit, and delivered orders.

Monthly Sales Trends

Time-series visualisation with interactive filters for granular drill-down.

KEY INSIGHTS

What the Data Revealed
